

Architectures

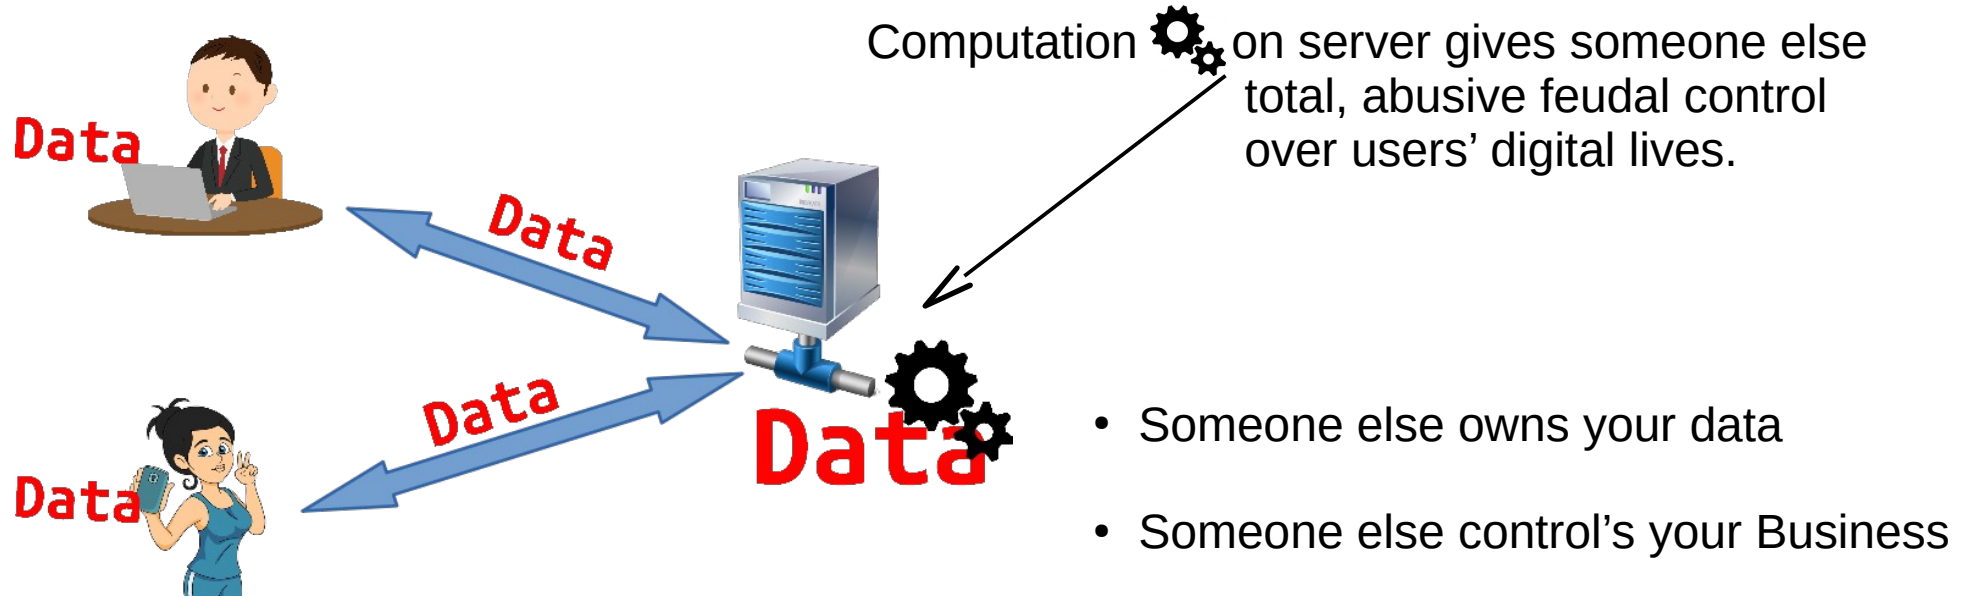

User Freedoms

3NWeb, 3NComputer, Apps

Architecture that breeds Digital Feudalism

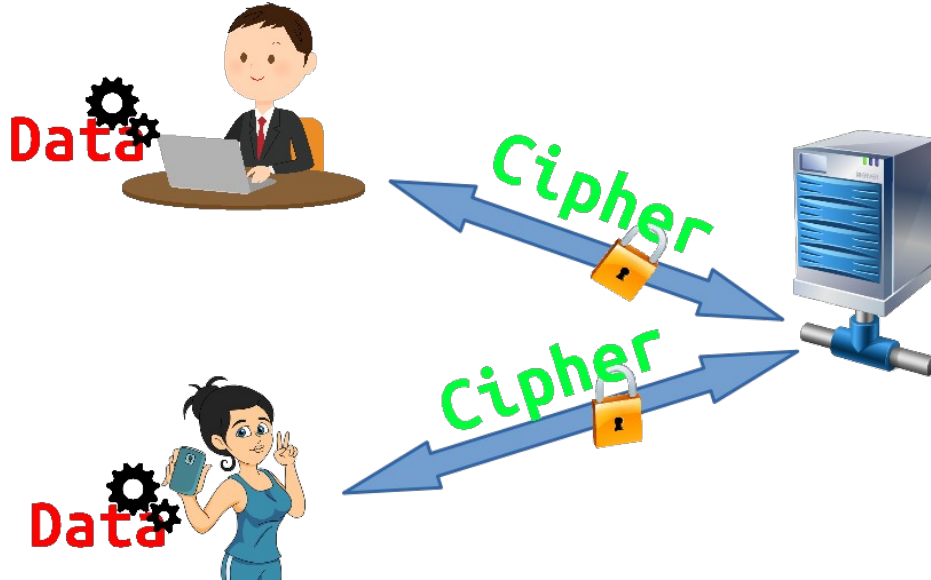

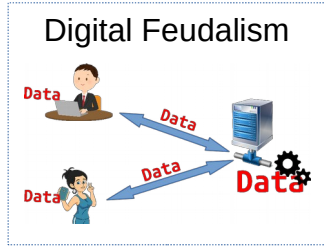

Digital Feudalism

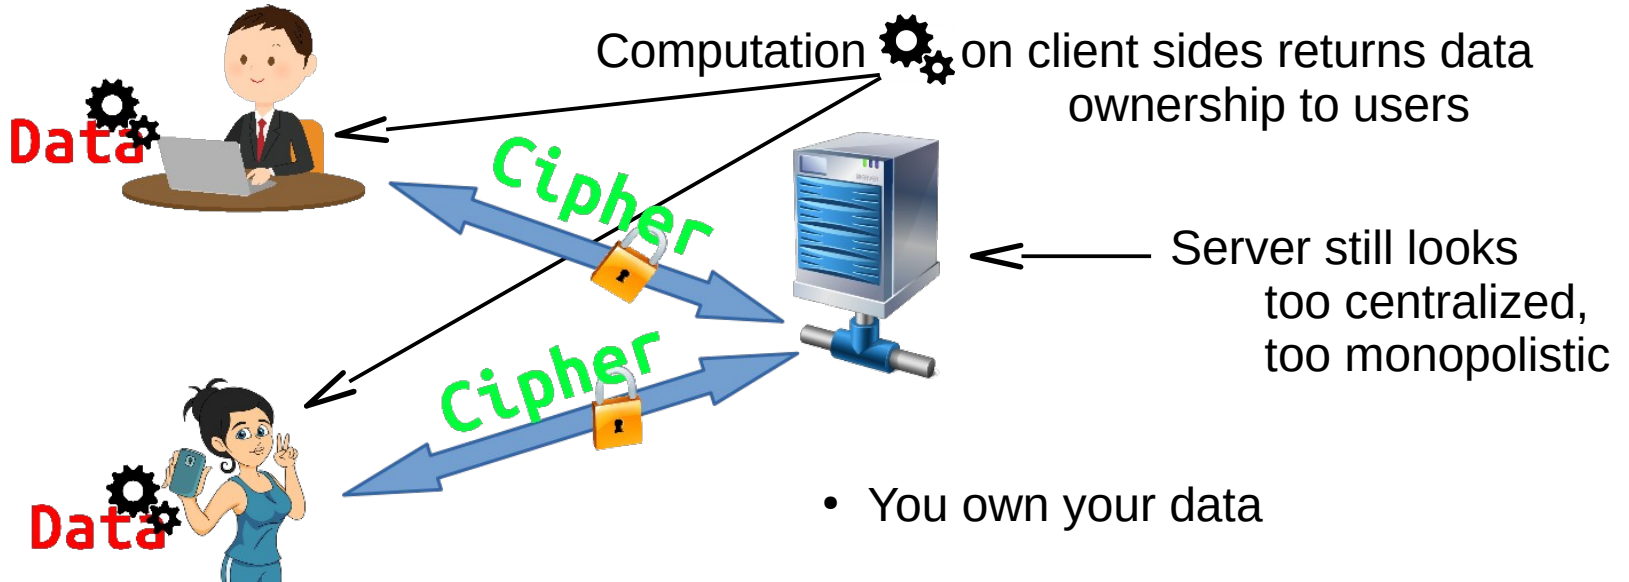

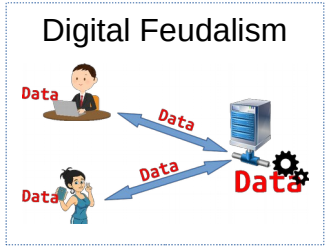

Computation on server gives someone else total, abusive feudal control over users' digital lives.

- Someone else owns your data
- Someone else control's your Business
- Someone else control's your Life
- You never have intimacy

Architecture for Data Ownership

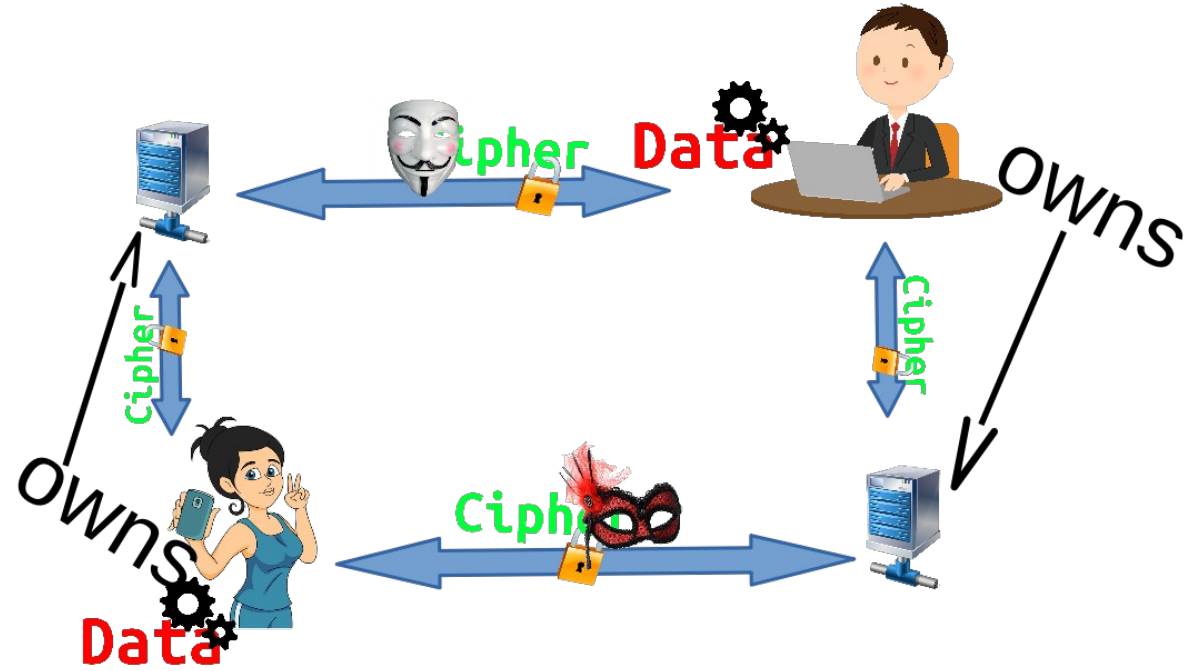

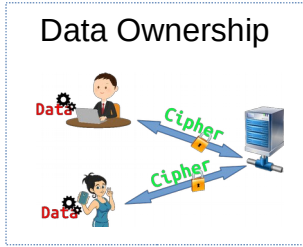

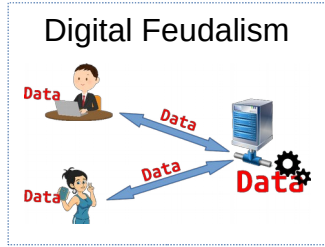

Data Ownership

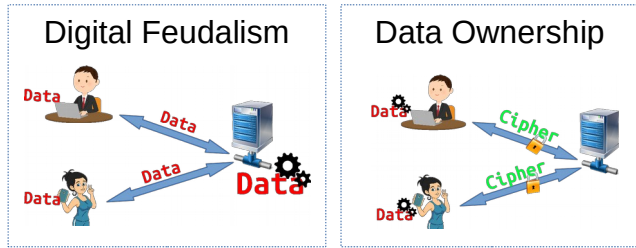

- You own your data
- You have data privacy
- Monopolistic provider may create problems

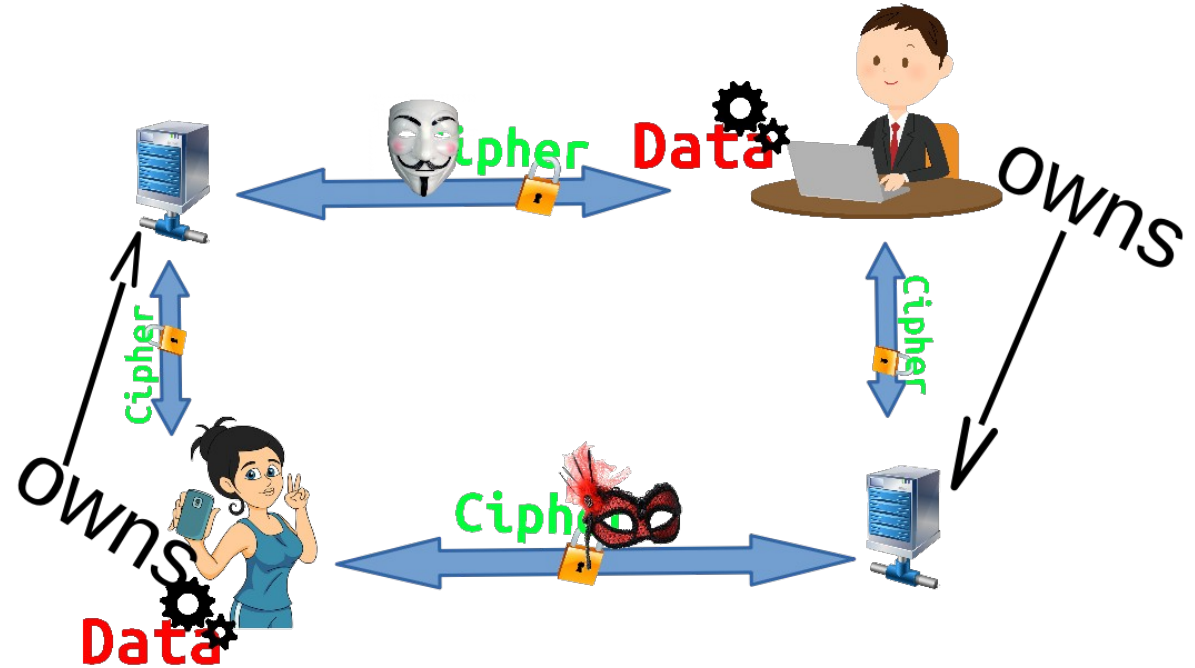

Architecture for Digital Freedom

Digital Freedom

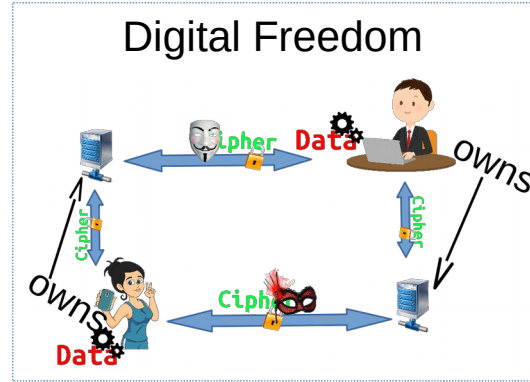

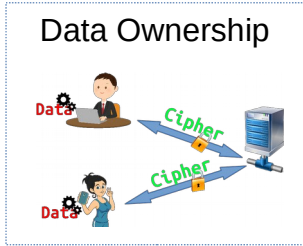

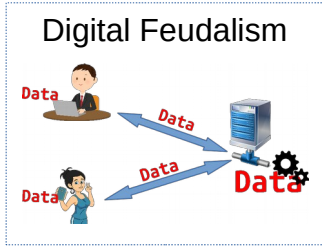

Web style federation:
a) ensures choice
of utility providers
b) reduces surveillance

- You own your data, only you know who you talk to and what apps you run
- Service provider can't take away your freedoms

3NWeb

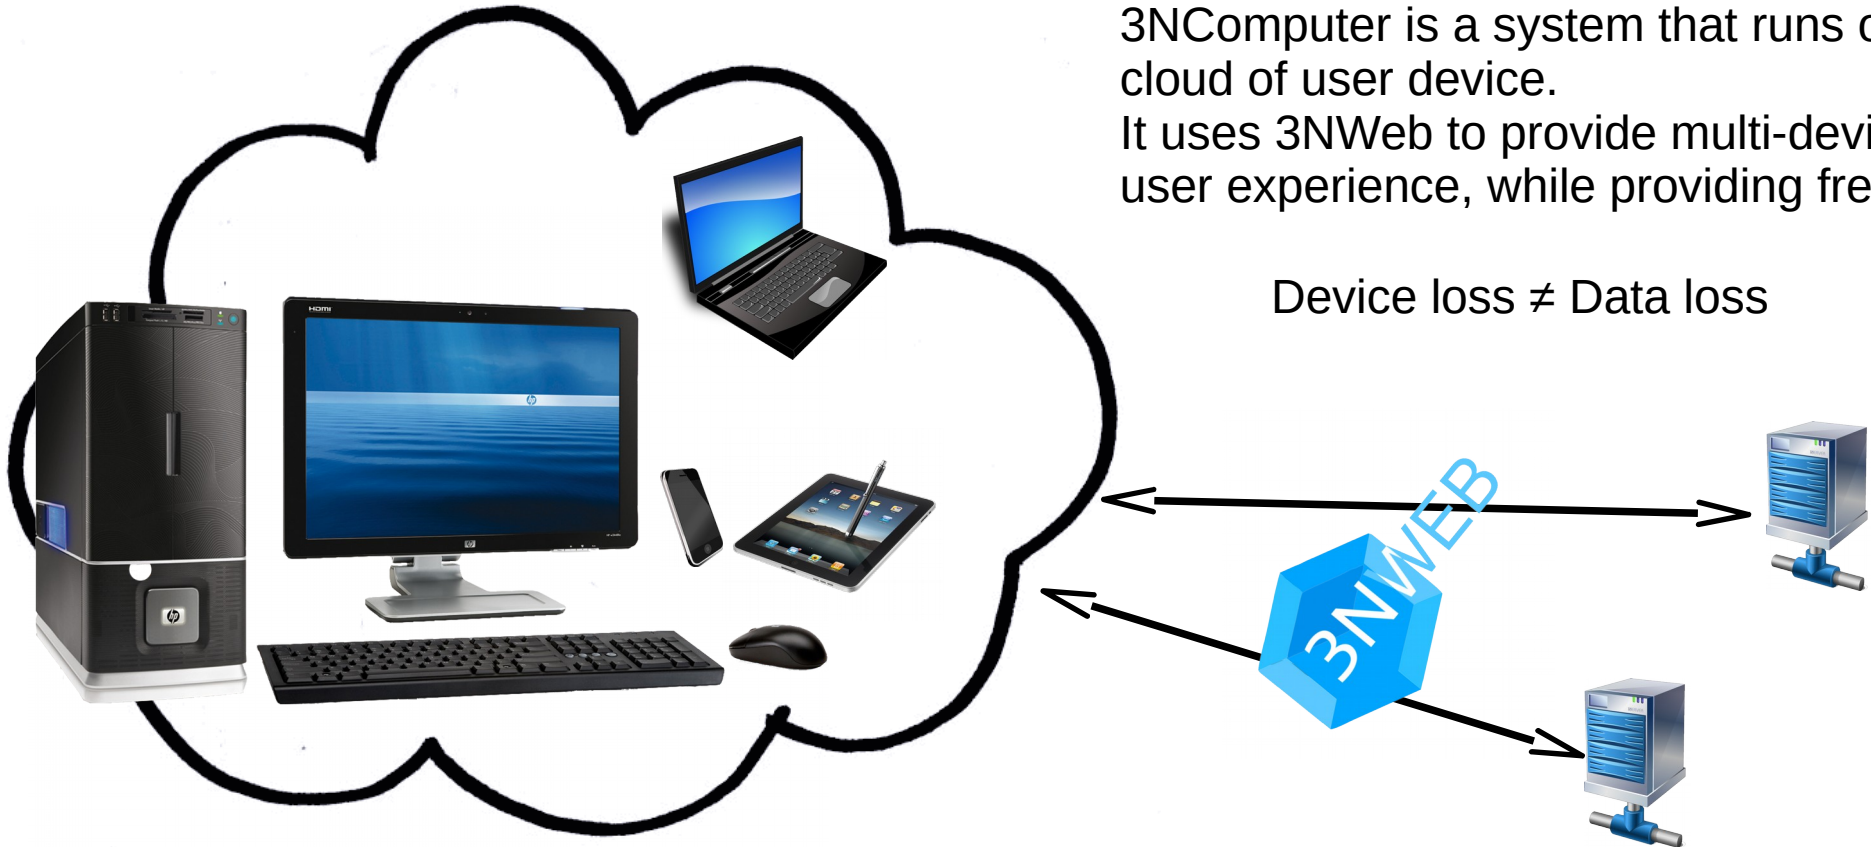

3NWeb is a set of utility services that provides base for apps, ensuring users' freedom

3NComputer

3NComputer is a system that runs on a cloud of user device.
It uses 3NWeb to provide multi-device user experience, while providing freedom.

Device loss \neq Data loss

3NWeb App

- Application that runs on 3NComputer
- Can use 3NWeb utilities to communicate with peers
- Hybrid application may talk to other servers (non-3NWeb)

What do you want to make?
